**Re: Expanding Flexible Use of the 3.7 to 4.2 GHz Band - GN Docket No. 18-122**

Dear Ms. Dortch:

On September 17, 2019, Qualcomm had a telephone conference with FCC staff to discuss our filings and the various emissions proposals that have been submitted in the above-referenced docket. Qualcomm was represented on the call by Dean Brenner, Gene Fong, Pushp Trikha, Ville Vintola, and the undersigned, and the FCC staff on the call were Julius Knapp, Kenneth Baker, Thomas Derenge, Janet Young, Paul Powell, Michael Ha, and Ira Keltz.

Qualcomm also reiterated its strong support of the FCC's efforts to open the 3.7 to 4.2 GHz mid-band spectrum for licensed mobile use in conjunction with other adjacent mid-band spectrum, including the Citizens Broadband Radio Service ("CBRS") band at 3.55 to 3.7 GHz and potentially the spectrum just below the CBRS band.<sup>1</sup> The Commission's efforts to open the 3.7 GHz band, which already is allocated for mobile use in other countries, is crucial to the success of 5G in the U.S.

Respectfully submitted,

John W. Kuzin  
Vice President and Regulatory Counsel
